OVERVIEW

Cisco ACI learning bootcamp for a renowned Telecom Service Provider

CUSTOMER OVERVIEW

Our customer is the executive arm of the critical communications sector for a major telecom service provider in KSA , which provides instant group wireless communication solutions and services to the business, government, industrial and commercial sectors in the Kingdom of Saudi Arabia.

LEARN BRIGHT

CHALLENGES

Our customer was building a state-of-art data center infrastructure based on Cisco Application-Centric Infrastructure (ACI) to host their mission critical business applications. To drive this project into success, their team wanted to cooperate with an advanced learning partner that can develop and deliver a customized learning service covering their specific Cisco ACI deployment use case.

LEARN BRIGHT

HOW OUR LEARNING SERVICES HELPED..

Since our team has deployed some of the most complex Cisco ACI projects across Africa and the Middle East, we capitalized on our extensive technical experience, and collaborated with our customer to create a customized and inclusive blueprint of a Cisco ACI bootcamp that covers the specific architecture, deployment, and operation aspects of the current and future requirements of their data center infrastructure.

The bootcamp has addressed both the essentials and advanced topics in a customized and flexible approach. Many advanced subjects such as cloud, micro-segmentation, orchestration, distributed architecture, and programmability have been applied specifically to the needs of our customer's business context.

LEARN BRIGHT

HOW OUR LEARNING SERVICES HELPED..CONT'D

Real-life use cases were explored during class, which has provided a different learning experience that took our customer's team beyond theories and gave them practical experience.

The in-depth knowledge provided in the bootcamp has remarkably assisted the customer to transform their traditional data center into a fully automated application-centric architecture.
